# INCREASING OPERATOR SAFETY AND OPERATIONAL PERFORMANCE.

## WHY BETTER SAFETY AND OPERATIONAL PERFORMANCE?

Industry statistics tell a story that impacts every business with people and equipment operating in high-risk environments:

- The average cost of workplace injury to a business is \$120,000 in direct and indirect cost.
- Unplanned downtime can cost between \$10,000-\$250,000 per hour due to lost operational productivity.
- 82% of freight operations experience at least one downtime event per year.
- Slip, trip, and fall injuries are the most common, with 25% of all fatalities are due to falls from height.

It is, therefore, important for business and operational leaders to consider solutions that reduce risk to people, equipment, and operational performance.

## SOLUTIONS THAT REDUCE RISK TO PEOPLE, BUDGETS, SCHEDULES AND PERFORMANCE.

### **SAFEsolutions**

- **Secure:** Engineered to deliver greater security and safety to people, equipment, and operational capability and performance.
- **Accessible:** Built to make accessibility to tank trucks, rail, marine, and industrial transportation equipment easy, safe, and productive—even to OSHA, ANSI and DOT standards.
- **Functional:** A wide range of solution options that meet your functional requirements and grow your functional capabilities as you need them to.
- **Economical:** Manual, hydraulic, and pneumatic options for access to equipment that saves money in the long run through better operational capability and worker safety.
